Summary Section

Investment Objective. The primary investment objective of the Longboard Long/Short Fund (the “Fund”) is to seek long-term capital appreciation.

Fees and Expenses of the Fund. This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on Class A shares if you invest, or agree to invest in the future, at least \$25,000 in the Fund. More information about these and other discounts is available from your financial professional and under “Shareholder Information – More About Class A Shares” beginning on page 14 of this Prospectus.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.75%	None
Maximum Deferred Sales Charge (Load) (as a % of the lesser of the original offering price or NAV at redemption)	1.00% ⁽¹⁾	None
Redemption Fee	None	None
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management (Unitary) Fees ⁽²⁾	2.99%	2.99%
Distribution and Service (Rule 12b-1) Fees	0.25%	0.00%
Other Expenses ⁽²⁾	<u>0.00%</u>	<u>0.00%</u>
Total Annual Fund Operating Expenses	3.24%	2.99%

(1) A maximum contingent deferred sales charge (“CDSC”) of 1.00% may apply to certain redemptions of Class A shares made within the first 12 months of their purchase when an initial sales charge was not paid on the purchase.

(2) The Fund’s Adviser provides investment advisory service and pays most of the Fund’s operating expenses (with certain exceptions) in return for a “unitary fee” (exclusive of any interest expenses, distribution fees or expenses, brokerage expenses, taxes and extraordinary expenses not incurred in the ordinary course of the Fund’s business. Acquired fund fees, expenses related to investments in short positions, and dividends, if any, will be borne by the Fund and will not be included in the unitary management fee).

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A	\$883	\$1,516	\$2,170	\$3,911
Class I	\$302	\$924	\$1,572	\$3,308

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the Fund’s fiscal year ended May 31, 2016, the Fund’s portfolio turnover rate was 0% of the average value of the portfolio.

Principal Investment Strategies. Under normal market conditions, the Fund pursues its investment objective by investing in domestic equity and equity-related instruments. The Fund defines equity securities as (1) common stocks, (2) preferred stocks, (3) stock warrants, (4) stock rights, (5) debt securities that are convertible into stock, (6) American depository receipts, (7) exchange-traded limited partnerships, (8) exchange-traded funds (“ETFs”), and (9) real estate investment trusts (“REITs”) (“Equity Instruments”). Equity related instruments are investments that provide exposure to the performance of Equity Instruments, including total return swaps on a basket of Equity Securities managed by the Adviser, equity swaps (both single-name and index swaps) and similar pooled investment vehicles (collectively, “Equity Derivative Instruments” and together with Equity Instruments, “Instruments”). The Fund may obtain up to 100% of its exposure to Equity Securities through Equity Derivative Instruments.

The Fund will seek positive long-term capital appreciation through the use of a diversified long/short equity strategy, which has been developed by the Adviser. The Fund, when taking a “long” equity position, will purchase a security that will benefit from an increase in the price of that security. When taking a “short” equity position, the Fund borrows the security from a third party and sells it at the then current market price. A “short” equity position will benefit from a decrease in price of the security and will lose value if the price of the security increases. Similarly, the Fund may also take “long” and “short” positions in an Equity Derivative Instrument. A “long” position in an Equity Derivative Instrument will benefit from an increase in the price of the underlying security. A “short” position in an Equity Derivative Instrument will benefit from a decrease in price of the underlying security and will lose value if the price of the underlying security increases. Simultaneously engaging in long investing and short selling is designed to reduce the net exposure of the overall portfolio to general market movements.

The Fund invests in securities of issuers of any capitalization and in any style (from growth to value) and may engage in frequent trading of its portfolio securities. The Fund’s strategy considers long positions in a large subset of 3,500 of the most liquid securities that trade on the NYSE, NASDAQ, and AMEX. This universe generally corresponds to the Russell 3000 Index, as well as the most liquid American depository receipts, exchange-traded limited partnerships, and real estate investment trusts. Short positions will be taken in Equity Derivative Instruments, including but not limited to, futures and/or ETFs that represent equity indices, including, but not limited to the S&P 500 (large cap), S&P 400 (mid cap), and Russell 2000 (small cap) indices. The Adviser seeks to reduce risk by using an active hedge comprised of short positions in index futures contracts or ETFs. Short positions will normally be held through a swap agreement in the case of ETFs, but will likely be held directly in the case of futures contracts. The degree to which the long portfolio is hedged is governed by factors such as targeted risk level, the number of security positions in the portfolio and market volatility.

The Fund will routinely invest more than 5% of its assets in short-term fixed income securities and cash or cash equivalents including, but not limited to, money market instruments, U.S. treasury bills, or shares of money market or short-term bond funds.

Principal Risks. Remember that in addition to possibly not achieving your investment goals, you could lose money by investing in the Fund. The principal risks of investing in the Fund are:

- *Credit Risk:* There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer’s financial condition changes.
- *Counterparty Risk:* The Fund will enter into various types of derivative contracts. Many of these derivative contracts will be privately negotiated in the over-the-counter market. These contracts also involve exposure to credit risk, since contract performance depends in part on the financial condition of the counterparty. If a privately negotiated over-the-counter contract calls for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, if a counterparty’s creditworthiness declines, the Fund may not receive payments owed under the contract, or such payments may be delayed under such circumstances and the value of agreements with such counterparty can be expected to decline, potentially resulting in losses by the Fund.
- *Cyber Security Risk.* As the use of technology has become more prevalent in the course of business, the Fund has become more susceptible to operational, financial and information security risks resulting from cyber-attacks and/or technological malfunctions. Successful cyber-attacks and/or technological malfunctions affecting the Fund or its service providers can result in, among other things, financial losses to the Fund and its shareholders, the inability to process transactions with shareholders or other parties and the release of private shareholder information or confidential Fund information. While measures have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in such measures and there is no guarantee those measures will be effective, particularly since the Fund does not directly control the cyber security measures of its service providers, financial intermediaries and companies in which it invests or with which it does business.
- *Derivatives Risk:* The Fund may use derivatives (including futures contracts, forward contracts and swap agreements) to enhance returns or hedge against market declines. The Fund’s indirect use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities including leverage risk, counterparty default risk and tracking risk.
- *Equity Securities Risk:* Stock markets are volatile. The price of an equity security fluctuates based on changes in a company’s financial condition and overall market and economic conditions.

- *Exchange-Traded Funds Risk:* Investments in exchange-traded funds (“ETFs”) carry security specific risks and market risk. Also, if the area of the market representing the underlying index or benchmark does not perform as expected for any reason, the value of the investment in the ETF may decline. In addition, due to transactions via market prices rather than at net asset value, the performance of an ETF may not completely replicate the performance of the underlying index. Investments in ETFs also add an extra layer of expenses.
- *Fixed Income Securities Risks:* Fixed income securities are subject to the risk that securities could lose value because of interest rate changes. Fixed income securities are also subject to prepayment and credit risks.
- *Foreign Risk.* To the extent the Fund invests in American Depository Receipts (“ADRs”) directly, the Fund may be subject to risks not usually associated with owning securities of U.S. issuers. These risks can include fluctuations in foreign currencies, foreign currency exchange controls, political and economic instability, differences in financial reporting, differences in securities regulation and trading, and taxation issues.
- *Forward and Futures Contract Risk:* The successful use of forward and futures contracts draws upon the Adviser’s skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser’s inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.
- *General Market Risk:* The risk that the value of the Fund’s shares will fluctuate based on the performance of the Fund’s investments and other factors affecting the securities markets generally.
- *Hedging Transactions Risk:* The Adviser, from time to time, employs various hedging techniques. The success of a Fund’s hedging strategy will be subject to the Adviser’s ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Since the characteristics of many securities change as markets change or time passes, the success of a Fund’s hedging strategy will also be subject to the Adviser’s ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner.
- *High Portfolio Turnover Risk:* The risk that when investing on a shorter-term basis, the Fund may as a result trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liability to shareholders in the Fund.
- *Issuer-Specific Risk:* The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.
- *Large-Cap Company Risk.* The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors.
- *Leverage Risk:* Using derivatives like futures, options and swaps to increase the Fund’s combined long and short exposure creates leverage, which can magnify the Fund’s potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund’s share price.
- *Limited History of Operations Risk:* The Fund is a new mutual fund and has a limited history of operation. Accordingly, an investment in the Fund entails a high degree of risk. There can be no assurance that the Fund and the Adviser will achieve the Fund’s investment objective.
- *Liquidity Risk:* Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.
- *Management Risk:* The risk that investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies.

- *Market Risk:* Overall securities and derivatives market risks may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities and derivatives markets. There is also the risk that common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. When the value of the Fund’s investments goes down, your investment in the Fund decreases in value and you could lose money.
- *Mid-Cap Company Risk:* The risk that the mid-cap companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, mid-cap stocks may be more volatile than those of larger companies.
- *Non-Diversified Portfolio Risk:* The Fund is “non-diversified,” and thus may invest its assets in a smaller number of companies or instruments than many other funds. As a result, an investment in the Fund has the risk that changes in the value of a single security may have a significant effect on the Fund’s value.
- *REIT Risk:* The value of the Fund’s REIT securities may be adversely affected by changes in the value of the REIT’s underlying property or the property secured by mortgages the REIT holds, or loss of REIT status. In addition, the Fund may experience a decline in its income from REIT securities due to falling interest rates or decreasing dividend payments.
- *Short Position Risk:* The Fund will incur a loss as a result of a short position if the price of the short position instrument increases in value between the date of the short position sale and the date on which an offsetting position is purchased. Short positions may be considered speculative transactions and involve special risks, including greater reliance on the Adviser’s ability to anticipate accurately the future value of a security or instrument. The Fund’s losses are potentially unlimited in a short position transaction.
- *Small- and Micro-Cap Company Risk:* The risk that the securities of small-cap and micro-cap companies may be more volatile and less liquid than the securities of companies with larger market capitalizations. These small-cap companies may not have the management experience, financial resources, product diversification and competitive strengths of large- or mid-cap companies, and, therefore, their securities tend to be more volatile than the securities of larger, more established companies.
- *Strategy Risk:* The risk that investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- *Swap Agreements Risk:* Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.
- *Tax Risk:* Certain of the Fund’s investment strategies, including transactions in options, futures contracts, forward contracts, swap contracts and hedging transactions, may be subject to the special tax rules (e.g., mark-to-market, constructive sale, wash sale and short sale rules), the effect of which may have adverse tax consequences for the Fund.
- *Volatility Risk:* The Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause the Fund’s net asset value per share to experience significant appreciations or decreases in value over short periods of time.

Performance. Because the Fund has less than a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of this Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information will be available at no cost by calling the Fund toll-free at 1-855-294-7540.

Investment Adviser. Longboard Asset Management, LLC serves as the Fund’s investment adviser (the “Adviser”).

Investment Adviser Portfolio Managers. The following serve as the Fund’s portfolio managers:

Portfolio Manager	Primary Title	Manager Since
Eric Crittenden	Chief Investment Officer	December 2014
Cole Wilcox	Chief Executive Officer	December 2014

Purchase and Sale of Fund Shares. You may conduct transactions by mail (Longboard Long/Short Fund, c/o Gemini Fund Services, LLC, 17605 Wright Street, Suite 2, Omaha NE 68130), or by telephone at 1-855-294-7540. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial investment in each share class of the Fund is \$2,500 and \$100,000, for Class A and Class I, respectively, with a minimum subsequent investment of \$250 and \$2,500 for Class A and Class I, respectively, although the Fund reserves the right to waive minimum initial investment or minimum subsequent investment requirements in its sole discretion.

Tax Information. The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Distributions on investments made through tax-deferred arrangements, such as 401(k) plans and individual retirement accounts, may be taxed later upon withdrawal of assets from such plans or accounts.

Payments to Broker-Dealers and Other Financial Intermediaries. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank, registered investment adviser, plan sponsor, administrator or other service provider who may be affiliated with the Adviser or the distributor), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Investment Strategies, Related Risks and Disclosure of Portfolio Holdings

Investment Objective

The primary investment objective of the Fund is to seek long-term capital appreciation.

The Fund's investment objective is not fundamental and may be changed without the approval of shareholders. Shareholders will be given 60 days' notice of any such change.

Principal Investment Strategies

Under normal circumstances, the Fund pursues its investment objective by investing in domestic equity and equity-related instruments. The Fund defines equity securities as (1) common stocks, (2) preferred stocks, (3) stock warrants, (4) stock rights, (5) debt securities that are convertible into stock, (6) American depository receipts, (7) exchange-traded limited partnerships, (8) exchange-traded funds ("ETFs"), and (9) real estate investment trusts ("REITs") ("Equity Instruments"). Equity related instruments are investments that provide exposure to the performance of equity instruments, including total return swaps on a basket of Equity Securities managed by the Adviser, equity swaps (both single-name and index swaps) and similar pooled investment vehicles (collectively, "Equity Derivative Instruments" and together with Equity Instruments, "Instruments"). The Fund may obtain up to 100% of its exposure to Equity Securities through Equity Derivatives Instruments.

The Fund will seek positive long-term capital appreciation through the use of a diversified long/short equity strategy, which has been developed by the Adviser. The Fund, when taking a "long" equity position, will purchase a security that will benefit from an increase in the price of that security. When taking a "short" equity position, the Fund borrows the security from a third party and sells it at the then current market price. A "short" equity position will benefit from a decrease in price of the security and will lose value if the price of the security increases. Similarly, the Fund may also take "long" and "short" positions in an Equity Derivative Instrument. A "long" position in an Equity Derivative Instrument will benefit from an increase in the price of the underlying security. A "short" position in an Equity Derivative Instrument will benefit from a decrease in price of the underlying security and will lose value if the price of the underlying security increases. Simultaneously engaging in long investing and short selling is designed to reduce the net exposure of the overall portfolio to general market movements.

The Fund invests in securities of issuers of any capitalization and in any style (from growth to value). The Fund's strategy considers long positions in a large subset of 3,500 of the most liquid securities that trade on the NYSE, NASDAQ, and AMEX. This universe generally corresponds to the Russell 3000 Index, as well as the most liquid American depository receipts, exchange-traded limited partnerships, and real estate investment trusts. Short positions will be taken in Equity Derivative Instruments, including but not limited to, futures and/or ETFs that represent equity indices, including, but not limited to, the S&P 500 (large cap), S&P 400 (mid cap), and Russell 2000 (small cap) indices. The Adviser seeks to reduce

risk by using an active hedge comprised of short positions in three index futures contracts. Short positions will generally be held through a swap agreement in the case of ETFs, but will likely be held directly in the case of futures contracts. The degree to which the long portfolio is hedged is governed by the same variables that influence the targeted risk level, the number of security positions in the portfolio and market volatility.

The Fund may use Equity Derivative Instruments as a substitute for investing in conventional securities and for investment purposes to increase its economic exposure to a particular security or index in a cost-effective manner. The Fund may gain some or all its equity exposure through the use of Equity Derivative Instruments. The Fund's use of Equity Derivative Instruments, swaps and certain other Instruments will have the economic effect of financial leverage. Financial leverage magnifies exposure to the swings in prices of an asset underlying an Equity Derivative Instrument and results in increased *volatility*, which means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund does not use Equity Derivative Instruments that have a leveraging effect. Leveraging tends to magnify, sometimes significantly, the effect of any increase or decrease in the Fund's exposure to an asset and may cause the Fund's NAV to be volatile. For example, if the Adviser seeks to gain enhanced exposure to a specific asset through an Equity Derivative Instrument providing leveraged exposure to the asset and that Equity Derivative Instrument increases in value, the gain to the Fund will be magnified; however, if that investment decreases in value, the loss to the Fund will be magnified. A decline in the Fund's assets due to losses magnified by the Equity Derivative Instruments providing leveraged exposure may require the Fund to liquidate portfolio positions to satisfy its obligations, to meet redemption requests or to meet asset segregation requirements when it may not be advantageous to do so. There is no assurance that the Fund's use of Equity Derivative Instruments providing enhanced exposure will enable the Fund to achieve its investment objective.

The Fund may, but is not required to, hedge with financial futures/forwards, including currencies and interest rates.

The Fund may engage in frequent trading of its portfolio securities.

A portion of the Fund's assets may be held in short-term fixed income securities and cash or cash equivalents including, but not limited to, money market instruments, U.S. treasury bills, or shares of money market or short-term bond funds. The Fund may maintain significant amounts in cash and cash equivalents when the Adviser reduces the Fund's market exposures. The Fund will routinely invest more than 5% of its assets in fixed income securities.

The Fund may temporarily depart from its principal investment strategies by making short-term investments in cash, cash equivalents, and high-quality, short-term debt securities and money market instruments for temporary defensive purposes in response to adverse market, economic or political conditions. This may result in the Fund not achieving its investment objectives during that period.

For longer periods of time, the Fund may hold a substantial cash position. If the market advances during periods when the Fund is holding a large cash position, the Fund may not participate to the extent it would have if the Fund had been more fully invested. To the extent that the Fund uses a money market fund for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses.

Principal Risks of Investing in the Fund

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested and the amount of risk you are willing to take. **Remember that in addition to possibly not achieving your investment goals, you could lose money by investing in the Fund.** The value of your investment in the Fund will go up and down with the prices of the securities in which the Fund invests. The principal risks of investing in the Fund are:

Credit Risk: There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes. Lower credit quality may lead to greater volatility in the price of a security and in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult for the Fund to sell the security. Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings. Credit risk also exists whenever the Fund enters into a foreign exchange or derivative contract, because the counterparty may not be able or may choose not to perform under the contract. When the Fund invests in foreign currency contracts, or other over-the-counter

derivative instruments (including options), it is assuming a credit risk with regard to the party with which it trades and also bears the risk of settlement default. These risks may differ materially from risks associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily mark-to-market and settlement, segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

Counterparty Risk: A Fund may enter into various types of derivative contracts as described below under “Derivatives Risk”. Many of these derivative contracts will be privately negotiated in the over-the-counter market. These contracts involve exposure to credit risk, since contract performance depends in part on the financial condition of the counterparty. If a privately negotiated over-the-counter contract calls for payments by a Fund, the Fund must be prepared to make such payments when due. In addition, if a counterparty’s creditworthiness declines, the Fund may not receive payments owed under the contract, or such payments may be delayed under such circumstances and the value of agreements with such counterparty can be expected to decline, potentially resulting in losses by a Fund.

Cyber Security Risk: As the use of technology has become more prevalent in the course of business, the Fund has become more susceptible to operational, financial and information security risks resulting from cyber-attacks and/or technological malfunctions. Cyber-attacks have occurred and will continue to occur. Cyber-attacks include, among other things, the attempted theft, loss, misuse, improper release, corruption or destruction of, or unauthorized access to, confidential or highly restricted data relating to the Fund and its shareholders; and attempted compromises or failures to systems, networks, devices and applications relating to the operations of the Fund and its service providers. Cyber security breaches may result from unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) or from outside attacks, such as denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users).

Derivatives Risk: The Fund may use derivatives (including futures contracts, forward contracts and swap agreements) to gain exposure to equity securities, enhance returns or hedge against market declines. The Fund’s use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. Because option premiums paid or received by the Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

Equity Securities Risk: Common and preferred stocks represent equity ownership in a company. Stock markets are volatile. The price of equity securities will fluctuate and can decline and reduce the value of a portfolio investing in equities. The value of equity securities purchased by the Fund could decline if the financial condition of the companies the Fund invests in declines or if overall market and economic conditions deteriorate. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or an increase in production costs and competitive conditions within an industry. In addition, they may decline due to general market conditions that are not specifically related to a company or industry, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or generally adverse investor sentiment.

Exchange-Traded Funds Risk: Investments in an exchange-traded fund (“ETFs”) carry security specific risks and market risk. Also, if the area of the market representing the underlying index or benchmark does not perform as expected for any reason, the value of the investment in the ETF may decline. In addition, due to transactions via market prices rather than at net asset value, the performance of an ETF may not completely replicate the performance of the underlying index. The Fund will indirectly pay its proportionate share of any fees and expenses paid by the ETF in which it invests in addition to the fees and expenses paid directly by the Fund, many of which may be duplicative. The Fund also will incur brokerage costs when it purchases ETFs. As a result, the cost of investing in the Fund generally will be higher than the cost of investing directly in ETFs.

Fixed Income Securities Risk: When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund possibly causing the Fund’s share price and total return to be reduced and fluctuate more than other types of investments.

Foreign Risk: To the extent the Fund invests in American Depository Receipts (“ADRs”) directly, the Fund may be subject to risks not usually associated with owning securities of U.S. issuers. These risks can include fluctuations in foreign currencies, foreign currency exchange controls, political and economic instability, differences in financial reporting, differences in securities regulation and trading, and taxation issues.

Forward and Futures Contract Risk: The successful use of forward and futures contracts draws upon the Adviser’s skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser’s inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

General Market Risk: The market value of a security may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price originally paid for it, or less than it was worth at an earlier time. Market risk may affect a single issuer, industry, sector of the economy or the market as a whole. U.S. and international markets have experienced significant volatility since 2008. The fixed income markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, increased likelihood of default and valuation difficulties. Concerns have spread to domestic and international equity markets. In some cases, the stock prices of individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. As a result of this significant volatility, many of the following risks associated with an investment in the Fund may be increased. The U.S. government has taken numerous steps to alleviate these market concerns. However, there is no assurance that such actions will be successful. Continuing market problems may have adverse effects on the Fund.

Hedging Transactions Risk: The Adviser, from time to time, employs various hedging techniques. The success of a Fund’s hedging strategy will be subject to the Adviser’s ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Since the characteristics of many securities change as markets change or time passes, the success of a Fund’s hedging strategy will also be subject to the Adviser’s ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner.

Hedging against a decline in the value of a portfolio position does not eliminate fluctuations in the values of those portfolio positions or prevent losses if the values of those positions decline. Rather, it establishes other positions designed to gain from those same declines, thus seeking to moderate the decline in the portfolio position’s value. Such hedging transactions also limit the opportunity for gain if the value of the portfolio position should increase. For a variety of reasons, the Adviser may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent a Fund from achieving the intended hedge or expose a Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs. The Adviser may determine, in its sole discretion, not to hedge against certain risks and certain risks may exist that cannot be hedged. Furthermore, the Adviser may not anticipate a particular risk so as to hedge against it effectively. Hedging transactions also limit the opportunity for gain if the value of a hedged portfolio position should increase.

High Portfolio Turnover Risk: To the extent that the Fund makes investments on a shorter-term basis (including in derivative instruments and instruments with a maturity of one year or less at the time of acquisition), the Fund may as a result trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liability to shareholders in the Fund. In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate, resulting in an expected portfolio turnover rate of 0% for the Fund. However, if these instruments were included in the calculation, the Fund's strategy would result in frequent portfolio trading and a high portfolio turnover rate (typically greater than 100%).

Issuer-Specific Risk: The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments. The value of the Fund's investment will be dependent on the success of the managed futures strategies used by the Adviser.

Large-Capitalization Securities Risk: While large cap companies may be less volatile than those of mid- and small-cap companies, they still involve risk. Large-capitalization companies usually cannot respond as quickly as smaller companies to competitive challenges, and their growth rates tend to lag the growth rates of well-managed smaller companies during strong economic periods. Further, the Fund may underperform funds that invest primarily in stocks of smaller capitalization companies during periods when the stocks of such companies are in favor.

Leverage Risk: Using derivatives like futures, options and swaps to increase the Fund's combined long and short position exposure creates leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of mutual funds that do not use such techniques.

Limited History of Operations Risk: The Fund is a new mutual fund and has a limited history of operation. Mutual funds and their advisers are subject to restrictions and limitations imposed by the 1940 Act and the Code that do not apply to an adviser's management of individual and institutional accounts. As a result, investors cannot judge the Adviser by a mutual fund-specific track record and it may not achieve its intended result in managing the Fund.

Liquidity Risk: The Fund is subject to liquidity risk. Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations. Funds with principal investment strategies that involve securities of companies with smaller market capitalizations, non-U.S. securities, Rule 144A securities, derivatives or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk.

Management Risk: The net asset value of the Fund changes daily based on the performance of the securities and derivatives (including futures and options) in which it invests. The Adviser's judgments about the attractiveness, value and potential appreciation of particular securities and derivatives in which the Fund invests may prove to be incorrect and may not produce the desired results. There can be no assurance that any of the securities or derivatives selected by the Adviser will produce positive returns.

Market Risk: The net asset value of the Fund will fluctuate based on changes in the value of the securities and derivatives in which the Fund invests. The Fund invests in securities and derivatives, which may be more volatile and carry more risk than some other forms of investment. The price of securities and derivatives may rise or fall because of economic or political changes. Security and derivative prices in general may decline over short or even extended periods of time. Market prices of securities and derivatives in broad market segments may be adversely affected by price trends in interest rates, exchange rates or other factors wholly unrelated to the value or condition of an issuer. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including expectations regarding: government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises.

Non-Diversified Portfolio Risk: The Fund is “non-diversified,” meaning that may invest its assets in a smaller number of companies or instruments than many other funds. As a result, your investment in the Fund has the risk that changes in the value of a single investment may have a significant effect on the Fund’s net asset value (“NAV”). Lack of broad diversification also may cause the Fund to be more susceptible to specific economic, political or regulatory events than a diversified fund. Although the Fund intends to satisfy the diversification requirements of a regulated investment company under section 851 of the Internal Revenue Code, those requirements are not as stringent as those required of a diversified fund under the 1940 Act.

REIT Risk: The value of the Fund’s REIT securities may be adversely affected by changes in the value of the REIT’s underlying property or the property secured by mortgages the REIT holds, or loss of REIT status. In addition, the Fund may experience a decline in its income from REIT securities due to falling interest rates or decreasing dividend payments.

Risks of Medium Sized Companies: To the extent the Fund invests in the stocks or bonds of medium capitalization companies, the Fund may be subject to additional risks. The earnings and prospects of these companies are more volatile than larger companies. Medium sized companies may experience higher failure rates than do larger companies. The trading volume of securities of medium sized companies is normally less than that of larger companies and, therefore, may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies. Small and medium sized companies may have limited markets, product lines or financial resources and may lack management experience.

Small- and Micro-Cap Company Risk: Generally, small- and micro-cap, and less seasoned companies, have more potential for rapid growth. They also often involve greater risk than large- or mid-cap companies, and these risks are passed on to the Fund. These smaller-cap companies may not have the management experience, financial resources, product diversification and competitive strengths of large- or mid-cap companies and, therefore, their securities tend to be more volatile than the securities of larger, more established companies, making them less liquid than other securities. Small- and micro-cap company stocks tend to be bought and sold less often and in smaller amounts than larger company stocks. Because of this, if the Fund wants to sell a large quantity of a smaller-cap company’s stock, it may have to sell at a lower price than the Adviser might prefer, or it may have to sell in smaller than desired quantities over a period of time. An investment in the Fund that is subject to these risks may be more suitable for long-term investors who are willing to bear the risk of these fluctuations.

Short Position Risk: The Fund’s long positions could decline in value at the same time that the value of the short positions increase, thereby increasing the Fund’s overall potential for loss. The Fund’s short positions may result in a loss if the price of the short position instruments rise and it costs more to replace the short positions. In contrast to the Fund’s long positions, for which the risk of loss is typically limited to the amount invested, the potential loss on the Fund’s short positions is unlimited; however, the Fund will be in compliance with Section 18(f) of the 1940 Act, to ensure that a Fund shareholder will not lose more than the amount invested in the Fund. Market factors may prevent the Fund from closing out a short position at the most desirable time or at a favorable price.

Swap Agreements Risk: Swap agreements are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which can be adjusted for an interest factor. Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

Tax Risk: The Fund’s short sales and transactions in futures contracts, forward contracts and swap contracts will be subject to special tax rules (including mark-to-market, constructive sale, wash sale and short sale rules) the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund’s securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses. These rules could, therefore, affect the amount, timing and character of distributions to the Fund’s shareholders. The Fund’s use of such transactions may result in the Fund realizing more short-term capital gains (subject to tax at ordinary income tax rates) and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions.

Volatility Risk: The Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause the Fund’s net asset value per share to experience significant appreciations or decreases in value over short periods of time.

Portfolio Holdings Information

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI. The Fund may, from time to time, make available month-end portfolio holdings information on the website www.longboardmutualfunds.com, which may include information about the Fund's exposure to securities of the swaps, structured notes or other investments, and the investment managers accessed through such investments. If month-end portfolio holdings information is posted to the website, the information is expected to be posted approximately 10 business days or sooner after the month-end and remain available until new information for the next month is posted. Shareholders may request portfolio holdings schedules at no charge by calling 1-855-294-7540.

Management of the Fund

The Adviser

The Fund has entered into an Investment Advisory Agreement ("Advisory Agreement") with Longboard Asset Management, LLC, located at 2355 East Camelback Road, Suite 750, Phoenix, Arizona 85016, under which the Adviser manages the Fund's investments subject to the supervision of the Board of Trustees.

Pursuant to the Advisory Agreement, the Fund pays the Adviser a unitary management fee for the services and facilities it provides at the annual rate of 2.99% of the Fund's average daily net assets up to \$250 million and 2.75% on assets greater than \$250 million. The unitary management fee is paid on a monthly basis. The initial term of the Advisory Agreement is two years. The Board of Trustees, shareholders of the Fund or the Adviser may terminate the Advisory Agreement upon sixty (60) days notice.

The Adviser's unitary management fee is designed to pay substantially all the Fund's expenses and to compensate the Adviser for providing services for the Fund. Out of the unitary management fee, the Adviser pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other services, except for interest expenses, distribution fees or expenses, brokerage expenses, taxes and extraordinary expenses not incurred in the ordinary course of the Fund's business. Acquired fund fees, expenses related to investments in short positions, and dividends, if any, will be borne by the Fund and will not be included in the unitary management fee. For the most recent fiscal year ended May 31, 2016, the Adviser received an advisory fee equal to 2.99% of the Fund's average daily net assets.

A discussion regarding the basis for the Board of Trustees' approval of the Advisory Agreement is available in the Fund's annual report to shareholders dated May 31, 2016.

Portfolio Managers

Eric Crittenden

Portfolio Manager
Chief Investment Officer

Eric Crittenden is the Chief Investment Officer of Longboard Asset Management. He brings nearly two decades of experience in disciplined, rules-based investment strategies to his position. Co-Founded by Mr. Crittenden in 2010, Longboard manages approximately \$600 million in assets (as of August 31, 2016).

Mr. Crittenden drives Longboard's focus on offering high quality alternative mutual funds that seek to deliver long-term results. A former teacher, Mr. Crittenden enjoys learning about the needs of our diverse clientele and helping them incorporate alternative investments into their practices.

Numerous publications have cited his research on trend following investment strategies, including *The Journal of Finance*. Mr. Crittenden graduated Magna Cum Laude from Wichita State University with a degree in Finance.

Cole Wilcox

Portfolio Manager
Chief Executive Officer

Cole Wilcox is the Chief Executive Officer of Longboard Asset Management. Under his leadership, Longboard provides high-quality, alternative mutual funds to top-performing financial advisors. Co-Founded by Mr. Wilcox in 2010, the firm manages approximately \$600 million in assets (as of August 31, 2016).

Mr. Wilcox focuses on the management of Longboard. He ensures that our team delivers service to our clients, so that they can feel confident about their alternative investment choices.

He follows and speaks often about emerging technologies and companies with disruptive business models. Recent media appearances include The Wall Street Journal, CNBC and Bloomberg. The Little Book of Trading has profiled Mr. Wilcox and he has co-authored several leading research papers on alternative investment strategies.

Mr. Wilcox is a graduate of the Owner/President Management Program at Harvard Business School.

Related Performance Information of the Adviser

The Longboard Long/Short Composite described below reflects all substantially similar managed accounts managed by the Adviser. The Fund is modeled after a private account similarly managed by the Adviser (the "Separate Account") and also managed by the Fund's portfolio managers, Eric Crittenden and Cole Wilcox. The Fund has substantially the same investment objective, policies, restrictions and strategies as the Separate Account. This section presents past performance information for the Longboard Long/Short Composite which includes all private accounts or funds managed by the Adviser with objectives, policies and strategies that are substantially similar to the Fund. The Longboard Long/Short Composite is not a mutual fund, but rather is a composite of all of the private accounts or funds (specifically, the Separate Account) managed by the Adviser that have investment objectives, policies and strategies that are substantially similar to those of the Fund.

The performance of the Longboard Long/Short Composite does not represent, and is not a substitute for, the performance of the Fund, and you should not assume that the Fund will have the same future performance as the Longboard Long/Short Composite. It is inappropriate and would be inaccurate for an investor to consider the Longboard Long/Short Composite's performance below as being indicative of the future performance of the Fund. The Adviser has included this section because it believes that the performance information presented is sufficiently relevant, as related or supplemental information only, to merit consideration by prospective Fund investors.

The table shows performance of the Longboard Long/Short Composite over time (as compared with a broad based market index for reference). Returns for the Longboard Long/Short Composite are shown both gross of fees and expenses and net of fees and expenses. Gross of fee and expense returns are returns gross of fees and expenses other than actual trading fees and expenses, and reflect all items of income, gain, and loss. Net of fee and expense returns are calculated by adjusting gross of fee and expense returns by the amount shown in the Fund's fee and expense table under the heading Total Annual Fund Operating Expenses for all periods. Net average annual total returns are shown below both with and without reflecting the impact of front-end sales loads that apply to certain share classes of the Fund. Net annual total returns shown below are not adjusted to reflect the impact of front-end or deferred sales loads that apply to certain share classes of the Fund. Net annual total returns would be lower if the Longboard Long/Short Composite returns were adjusted to reflect the impact of such sales loads.

Investors should be aware that the Securities and Exchange Commission (the "SEC") uses a methodology different from that used below to calculate performance for mutual funds, which could result in different performance results. The Adviser claims compliance with the Global Investment Performance Standards ("GIPS®"). Under the GIPS standard, the Adviser is defined as follows: Longboard Asset Management LLC. A copy of the compliant presentation for the Longboard Long/Short Composite is available upon request by contacting the Adviser directly by e-mailing curtis@longboard-am.com or calling 602-472-3144. Indices are unmanaged and it is not possible to invest directly in indices. As such, year-by-year index figures do not account for any fees or fund expenses.

The past performance in managing other portfolios is no guarantee of future results in managing the Fund. Please note the following cautionary guidelines in reviewing this disclosure:

- **Performance figures are not the performance of the Fund. The Longboard Long/Short Composite's performance shown is not the performance of the Fund and is not an indication of how the Fund would have performed in the past or will perform in the future. The Fund's performance in the future will be different from the Longboard Long/Short Composite's performance presented, due to factors such as differences in the cash flows, different fees, expenses, portfolio size and composition, and possibly asset allocation methodology. In particular, Longboard Long/Short Composite's performance is not necessarily an indication of how the Fund will perform, as the portfolio is not subject to investment limitations, leverage restrictions, diversification requirements and other restrictions imposed on investment companies by the 1940 Act and the Internal Revenue Code, which, if applicable, can have a negative impact on the Fund's performance.**
- **There have been significant fluctuations in the market in the past few years. The performance for the period is shown through December 31, 2015. The markets have been volatile in the last few years, and this trend may continue. As a result, the performance included herein will not reflect the latest volatility in the markets, if any occurs.**
- **The performance shown are averages. The information below shows annual rates of return for the years indicated, but does not reflect any volatility that may have occurred within a given period. The following table provides for the Longboard Long/Short Composite's annual rates of return for the years indicated, net and gross of fees, as discussed above.**

**The Longboard Long/Short Composite
Calendar Year Returns as of December 31**

	2006	2007	2008	2009	2010	2011 ⁽²⁾	2012	2013	2014	2015

S&P 500 Index ⁽³⁾	1.38%	15.13%	12.57%	7.58%

- (1) From the inception of the Separate Account on November 1, 2005.
- (2) Performance presented prior to Aug. 1, 2011 occurred while the Fund's portfolio managers were affiliated with a prior firm and the Fund's portfolio managers were the only individuals responsible for selecting the securities to buy and sell for the Separate Account.
- (3) The S&P 500 total return index is a domestic equity index consisting of 500 stocks representing approximately 75% of the total U.S. equity market focusing on the large-cap sector of the U.S. equities market. The index includes the 500 leading companies in leading industries of the U.S. economy. The index returns are unmanaged and do not reflect the deduction of any fees or expenses.
- (4) Does not reflect the impact of Class A's contingent deferred sales charge.

Shareholder Information

Choosing a Share Class

The Trust has adopted a multiple class plan that allows the Fund to offer one or more classes of shares. The Fund has registered four classes of shares – Class A shares, Class C shares, Class I shares and Class N shares. Currently, only Class A shares and Class I shares are being offered. The different classes of shares represent investments in the same portfolio of securities, but the classes generally offered through different distribution channels and are subject to different expenses and may have different share prices as outlined below:

- Class A shares are charged a front-end sales load. The Class A shares are also charged a 0.25% Rule 12b-1 distribution and servicing fee. Class A shares are generally offered through financial intermediary platforms, including, but not limited to, traditional brokerage platforms.
- Class I shares are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund.

More About Class A Shares

Class A shares are offered at their public offering price, which is NAV plus the applicable sales charge and is subject to 12b-1 distribution fees of up to 0.25% of the average daily net assets of Class A shares. The minimum initial investment in Class A shares of the Fund is \$2,500. The minimum subsequent investment in Class A shares of the Fund is \$250. The sales charge varies, depending on how much you invest. There are no sales charges on reinvested distributions. The Fund reserves the right to waive sales charges at its discretion. The following sales charges apply to your purchases of Class A shares of the Fund:

Amount of Transaction	Sales Charge as % of Public Offering Price ⁽¹⁾	Sales Charge as % of Net Amount Invested	Dealer Reallowance as a Percentage of Public Offering Price
Less than \$25,000	5.75%	6.10%	5.00%
\$25,000 but less than \$50,000	4.75%	4.99%	4.25%
\$50,000 but less than \$100,000	4.50%	4.71%	4.00%
\$100,000 but less than \$250,000	3.50%	3.63%	3.25%
\$250,000 but less than \$500,000	2.25%	2.30%	2.00%
\$500,000 but less than \$1,000,000	1.75%	1.78%	1.50%
\$1,000,000 or more	0.00% ⁽²⁾	0.00%	** ⁽³⁾

⁽¹⁾ Offering price includes the front-end sales load. The sales charge you pay may differ slightly from the amount set forth above because of rounding that occurs in the calculation used to determine your sales charge.

⁽²⁾ Investors that purchase \$1,000,000 or more of the Fund's Class A shares will not pay any initial sales charge on the purchase. However, purchases of \$1,000,000 or more of Class A shares may be subject to a contingent deferred sales charge ("CDSC") on shares redeemed during the first 12 months after their purchase in the amount of the commissions paid on the shares redeemed.

⁽³⁾ A selling broker may receive commissions on purchases of Class A shares over \$1 million calculated as follows: 1.00% on purchases between \$1 million and \$3 million, 0.75% on amounts over \$3 million but less than \$5 million, 0.50% on amounts over \$5 million but less than \$10 million and 0.25% on amounts over \$10 million. The commission rate is determined based on the purchase amount combined with the current market value of existing investments in Class A shares.

Reducing Your Sales Charge

You may be eligible to purchase Class A shares at a reduced sales charge. To qualify for these reductions, you must notify the Fund's distributor, Northern Lights Distributors, LLC (the "distributor"), in writing and supply your account number at the time of purchase. You may combine your purchase with those of your "immediate family" (your spouse and your children under the age of 21) for purposes of determining eligibility. If applicable, you will need to provide the account numbers of your spouse and your minor children as well as the ages of your minor children.

Letter of Intent. Under a Letter of Intent ("LOI"), you commit to purchase a specified dollar amount of Class A shares of the Fund, with a minimum of \$50,000, during a 13-month period. At your written request, Class A shares purchases made during the previous 90 days may be included. The amount you agree to purchase determines the initial sales charge you pay. If the full-face amount of the LOI is not invested by the end of the 13-month period, your account will be adjusted to the higher initial sales charge level for the amount actually invested. You are not legally bound by the terms of your LOI to purchase the amount of your shares stated in the LOI. The LOI does, however, authorize the Fund to hold in escrow 5% of

the total amount you intend to purchase. If you do not complete the total intended purchase at the end of the 13 month period, the Fund's transfer agent will redeem the necessary portion of the escrowed shares to make up the difference between the reduced rate sales charge (based on the amount you intended to purchase) and the sales charge that would normally apply (based on the actual amount you purchased).

Rights of Accumulation. To qualify for the lower sales charge rates that apply to larger purchases of Class A shares, you may combine your new purchases of Class A shares with Class A shares of the Fund that you already own. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the current value of all other Class A shares that you own. The reduced sales charge will apply only to current purchases and must be requested in writing when you buy your shares.

Shares of the Fund held as follows cannot be combined with your current purchase for purposes of reduced sales charges:

- Shares held indirectly through financial intermediaries other than your current purchase broker-dealer (for example, a different broker-dealer, a bank, a separate insurance company account or an investment adviser);
- Shares held through an administrator or trustee/custodian of an Employer Sponsored Retirement Plan (for example, a 401(k) plan) other than employer-sponsored IRAs;
- Shares held directly in the Fund account on which the broker-dealer (financial advisor) of record is different than your current purchase broker-dealer.

Waiving Your Class A Sales Charge

The sales charge on purchases of Class A shares is waived for certain types of investors, including:

- Current and retired directors and officers of the Fund sponsored by the Adviser or any of its subsidiaries, their families (*e.g.*, spouse, children, mother or father) and any purchases referred through the Adviser.
- Employees of the Adviser and their families, or any full-time employee or registered representative of the distributor or of broker-dealers having dealer agreements with the distributor (a "Selling Broker") and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the fund's shares and their immediate families.
- Participants in certain "wrap-fee" or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the distributor.
- Clients of financial intermediaries that have entered into arrangements with the distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisers may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker-dealers that charge a transaction fee and that have entered into agreements with the distributor.
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Employer-sponsored retirement or benefit plans with total plan assets in excess of \$5 million where the plan's investments in the Fund are part of an omnibus account. A minimum initial investment of \$1 million in the Fund is required. The distributor in its sole discretion may waive these minimum dollar requirements.

The Fund does not waive sales charges for the reinvestment of proceeds from the sale of shares of a different fund where those shares were subject to a front-end sales charge (sometimes called an "NAV transfer"). Whether a sales charge waiver is available for your retirement plan or charitable account depends upon the policies and procedures of your intermediary. Please consult your financial adviser for further information.

A CDSC of up to 1.00% of the purchase price will be charged to the shareholders who received a sales charge waiver and then redeem their shares within one year after purchase. This CDSC will be based on the lower of the cost of the shares or their NAV at the time of redemption.

The Fund also reserves the right to enter into agreements that reduce or eliminate sales charges for groups or classes of shareholders, or for Fund shares included in other investment plans such as “wrap accounts.” If you own Fund shares as part of another account or package, such as an IRA or a sweep account, you should read the terms and conditions that apply for that account. Those terms and conditions may supersede the terms and conditions discussed here. Contact your selling agent for further information.

Further information regarding the Fund’s sales charges, breakpoints and waivers is available free of charge upon request.

More About Class I Shares

Class I shares may be purchased without the imposition of any sales charges. Class I shares may also be offered through certain financial intermediaries (including broker-dealers) and their agents in fee based and other programs. In these programs financial intermediaries have made arrangements with the Fund and are authorized to buy and sell shares of the Fund that charge their customers transaction or other distribution or service fees with respect to their customers’ investments in the Fund. Class I shares are sold at NAV without an initial sales charge, and are not subject to 12b-1 distribution fees. The minimum initial investment in Class I shares of the Fund is \$100,000. The minimum subsequent investment in Class I shares of the Fund is \$2,500.

Share Price

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of each class of shares is calculated as of the close of regular trading (generally 4:00 p.m., Eastern time) on each day that the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund’s securities are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on the primary exchange. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board and evaluated by the Board as to the reliability of the fair value method used. In these cases, the Fund’s NAV will reflect certain portfolio securities’ fair value rather than their market price. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security is materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the Fund does not price its shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund's net asset value is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

How to Purchase Shares

The Fund currently offers Class A shares and Class I shares. The main differences between the classes are the ongoing fees. In choosing which class of shares to purchase, you should consider which will be most beneficial to you given your investment goals, the amount of your purchase and the length of time you expect to hold the shares. Each class of shares in the Fund represents an interest in the same portfolio of investments in the Fund. Not all share classes may be available for purchase in all states.

Purchase by Mail. To purchase the Fund's shares by mail, simply complete and sign the Account Application and mail it, along with a check made payable to "Longboard Long/Short Fund" to:

via Regular mail:

Longboard Long/Short Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

via Overnight mail:

Longboard Long/Short Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, NE 68130

Purchase through Brokers. You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Fund's behalf.

Purchase by Wire. If you wish to wire money to make an investment in the Fund, please call the Fund at 1-855-294-7540 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan. You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-855-294-7540 for more information about the Fund's Automatic Investment Plan. Minimum initial investment requirements may be waived for Automatic Investment Plan investors, at the Fund's discretion.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to "Longboard Long/Short Fund." The Fund will not accept payment in cash, including cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

Anti-Money Laundering Program. The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

In order to ensure compliance with these laws, the Account Application asks for, among other things, the following information for all "customers" seeking to open an "account" (as those terms are defined in rules adopted pursuant to the USA PATRIOT Act):

- full name;
- date of birth (individuals only);
- Social Security or taxpayer identification number; and
- permanent street address (P.O. Box only is not acceptable).

Accounts opened by entities, such as corporations, limited liability companies, partnerships or trusts, will require additional documentation.

Please note that if any information listed above is missing, your Account Application will be returned and your account will not be opened. In compliance with the USA PATRIOT Act and other applicable anti-money laundering laws and regulations, the Transfer Agent will verify the information on your application as part of the Program. The Fund reserves the right to request additional clarifying information and may close your account if such clarifying information is not received by the Fund within a reasonable time of the request or if the Fund cannot form a reasonable belief as to the true identity of a customer. If you require additional assistance when completing your Account Application, please contact the Transfer Agent at 1-855-294-7540.

How to Redeem Shares

You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

via Regular mail:

Longboard Long/Short Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

via Overnight mail:

Longboard Long/Short Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, NE 68130

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 855-294-7540. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of your telephone instructions. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$100 on specified days of each month into your established bank account. Please contact the Fund at 1-855-294-7540 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). The securities will be liquid securities, chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash and securities redeemed in-kind remain at the risk of the market until they are sold.

When Redemptions are Sent: Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of a request in "good order." If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank (usually within 10 days of the purchase date).

Good Order: Your redemption request will be processed if it is in "good order." To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance falls below the minimum investment amount for the class of shares you hold (e.g., \$100,000 for a Class I account, etc.), the Fund may notify you that, unless the account is brought up to the minimum investment amount within 60 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below required minimum due to a decline in NAV.

Tools to Combat Frequent Transactions

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Fund's Board has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy;" and
- Rejecting or limiting specific purchase requests.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

The Fund reserves the right to reject or restrict purchase for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase or exchange orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial adviser) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions, and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

Householding. To reduce expenses, the Fund mails only one copy of the Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-855-294-7540 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

Distribution of Fund Shares

The Distributor

Northern Lights Distributors, LLC (the “Distributor”) is located at 17605 Wright Street, Omaha, NE 68130, and serves as distributor and principal underwriter to the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). Shares of the Fund are offered on a continuous basis.

Distribution and Shareholder Servicing Plan (12b-1) Plan

The Fund has adopted a Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 (the “12b-1 Plan”) under the 1940 Act applicable to the Fund’s Class A shares. Under the 12b-1 Plan, the Fund is authorized to pay the Fund’s distributor, or such other entities as approved by the Board of Trustees, a fee for the promotion and distribution of the Fund and the provision of personal services to shareholders. The maximum amount of the fee authorized is 0.25% of the Fund’s average daily net assets annually for the Class A shares. The distributor may pay any or all amounts received under the 12b-1 Plan to other persons, including the Adviser, for any distribution or service activity. Because these fees are paid out of the Fund’s assets on an on-going basis, over time these fees will increase the cost of your investment in the Fund and may cost you more than paying other types of sales charges.

In addition to the fees paid under the 12b-1 Plan, the Fund may pay service fees to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions, including the Adviser and affiliates of the Adviser, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus, other group accounts or accounts traded through registered securities clearing agents.

Additional Compensation to Financial Intermediaries

The distributor, its affiliates and the Adviser, out of their own revenues, which generally come directly or indirectly from Fund fees, and without additional cost to the Fund or its shareholders, may provide additional cash payments or non-cash compensation to intermediaries who sell shares of the Fund. Such payments and compensation are in addition to other types of shareholder servicing and distribution payments described elsewhere in this Prospectus. In return for these additional payments and compensation, the Adviser and distributor expect the Fund to receive certain marketing or servicing advantages that are not generally available to mutual funds whose sponsors do not make such payments. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to the Fund’s shareholders. The Adviser may also pay cash compensation in the form of finder’s fees that vary depending on the dollar amount of the shares sold. These additional payments and compensation may create potential conflicts of interest between an investor and a financial intermediary who is recommending or making available the Fund over other mutual funds, especially if these payments exceed the amount paid by other mutual funds. Before investing, you should consult with your investment professional and review carefully any disclosure by the investment professional as to what compensation the investment professional receives from mutual fund sponsors, as well as how your investment professional is compensated.

Distributions and Taxes

Tax Status, Dividends and Distributions

Any sale or exchange of a Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.

The Fund intends to distribute substantially all of its net investment income and net capital gains annually in December. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant from such accounts or plans.

Your redemptions, including exchanges, may result in a capital gain or loss for federal income tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. This summary is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. The tax considerations relevant to a specific shareholder depend upon its specific circumstances, and this summary does not attempt to discuss all potential tax considerations that could be relevant to a prospective shareholder with respect to the Fund or its investments. This general summary is based on the Internal Revenue Code of 1986, as amended (the "Code"), the Federal Income Tax Regulations promulgated thereunder, and administrative and judicial interpretations thereof as of the date hereof, all of which are subject to change (potentially on a retroactive basis). You should consult your own independent tax advisors to determine the tax consequences of owning the Fund's shares.

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by RSM US LLP, whose report, along with the Fund's financial statements are included in the Fund's May 31, 2016 annual report, which is available at no charge upon request.

Longboard Long/Short Fund

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout The Period

Class A	For the Period Ended May 31, 2016 (1)
Net asset value, beginning of period	\$ 10.15
Activity from investment operations:	
Net investment loss (2)	(0.15)
Net realized and unrealized loss on investments	(0.56)
Total from investment operations	<u>(0.71)</u>
Net asset value, end of period	\$ 9.44
Total return (3)(5)	<u>(7.00)%</u>
Net assets, at end of period (000s)	\$ 615
Ratio of total expenses to average net assets (4)	3.24%
Ratio of net investment loss to average net assets (4)	(3.24)%
Portfolio turnover rate (5)	0%

(1) The Longboard Long/Short Fund Class A shares commenced operations December 9, 2015.

(2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(3) Total returns are historical in nature and assume changes in share price, reinvestment of dividends and capital gains distributions, if any. Total returns for periods less than one year are not annualized.

(4) Annualized for periods less than one year.

(5) Not annualized.

Longboard Long/Short Fund

Portfolio turnover rate (5)	0%	0%

(1) The Longboard Long/Short Fund Class I shares commenced operations March 20, 2015.

(2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(3) Total returns are historical in nature and assume changes in share price, reinvestment of dividends and capital gains distributions, if any. Total returns for periods less than one year are not annualized.

(4) Annualized for periods less than one year.

(5) Not annualized.

(6) The NAV and offering price shown above differs from the traded NAV on May 29, 2015 due to financial statement rounding and/or financial statement adjustments.

(7) Amounts represents less than \$0.005 per share.

Privacy Policy

Revised July 2015

FACTS		WHAT DOES NORTHERN LIGHTS FUND TRUST II ("NLFT II") DO WITH YOUR PERSONAL INFORMATION?	
Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.		
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include:		
	<ul style="list-style-type: none"> • Social Security number • Employment information • Account balances 	<ul style="list-style-type: none"> • Account transactions • Income • Investment experience 	
	When you are no longer our customer, we continue to share your information as described in this notice.		
How?	All financial companies need to share a customer's personal information to run their everyday business - to process transactions, maintain customer accounts, and report to credit bureaus. In the section below, we list the reasons financial companies can share their customer's personal information; the reasons NLFT II chooses to share; and whether you can limit this sharing.		
Reasons we can share your personal information		Does NLFT II share?	Can you limit this sharing?
For our everyday business purposes -- such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus		Yes	No
For our marketing purposes -- to offer our products and services to you		Yes	No
For joint marketing with other financial companies		Yes	No
For our affiliates' everyday business purposes -- information about your transactions and experiences		Yes	No
For our affiliates' everyday business purposes -- information about your creditworthiness		No	We don't share
For nonaffiliates to market to you		No	We don't share

FOR MORE INFORMATION

You can find more information about the Fund in the following documents:

Statement of Additional Information

The SAI provides additional details about the investments and techniques of the Fund and certain other additional information. A current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Annual and Semi-Annual Reports

Additional information about the Fund's investments will also be available in the Fund's Annual and Semi-Annual Reports to Shareholders. In the Fund's Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

To obtain a free copy of the SAI and, when issued, the Annual and Semi-Annual Reports to Shareholders, or make general inquiries about the Fund by calling the Fund (toll-free) at 1-855-294-7540 or visit www.longboardmutualfunds.com. You may also write to:
